Professional Summary

Results-driven Data Analyst with 9+ years of experience in data analytics, business intelligence, and process optimization. I have proficient in SQL, Python, Power BI, Tableau, and ETL development. I have a proven track record of delivering data-driven insights to optimize business performance. I possess strong problem-solving, good communication, and leadership abilities.

Skills

- Data Analysis & Visualization (Power BI, Tableau)
- SQL & Database Management
- Python (Pandas, NumPy)
- ETL Development & Data Pipelines
- Data Cleaning & Data Governance
- Business Intelligence & Reporting
- Predictive Analytics & Statistical Modeling
- Process Optimization & Root Cause Analysis
- Machine Learning Model Calibration

Certifications

- Power BI Certified Professional
- MCP: Microsoft Certified Professional
- SQL Certified Professional

Professional Experience

- Data Analyst - Maoni Solutions Limited, Manchester, UK Dec

2021 – Present

- Develop and execute test cases for data dashboards and BI reports.

- Generate insights using Power BI and Tableau from data sources such as SQL, Snowflake, and Excel.
 - Perform data cleaning, modeling, governance, and predictive analytics to optimize reporting accuracy.
 - Develop ETL pipelines and automate data validation for migration projects.
 - Collaborate with stakeholders to improve reporting processes using root cause analysis and data mining.
- Data Analyst - C & C UK First Ltd, UK
Jan 2019 – Jun 2021
 - Developed an ETL pipeline using SQL and Python (Pandas), reducing data processing time by 30%.
 - Implemented data cleansing techniques to improve data integrity and accuracy.
 - Built staging tables and logging mechanisms for enhanced data tracking and debugging.
 - Data Manager - Claremont Archive & Data Storage, Glasgow, UK
Sep 2017 – Nov 2018
 - Designed SAS queries and statistical models for customer data insights, increasing response rates by 5%.
 - Performed A/B testing and data-driven marketing analysis, reducing customer acquisition costs by £250,000.
 - Developed data processing workflows using PySpark and SQL for optimized data management.

Projects

- Tesco PLC (UK)

Role: Tableau Developer | Duration: Jan 2022 – Dec 2023

- Developed interactive dashboards for sales and distribution analysis using Tableau.
- Implemented data visualization techniques (e.g., bump charts, donut charts) for enhanced reporting.
- Optimized business intelligence insights by integrating various data sources (SQL, Excel, Snowflake).

Cornerstone Network (UK)

Role: Data Analyst (Power BI) | Duration: Jan 2024 – Jun 2024

- Created Power BI dashboards to visualize network coverage gaps in the UK.
- Performed data cleansing and integration to enable stakeholders to assess coverage reports.
- Utilized advanced visualizations (scatter plots, maps) for intuitive data presentation.

Education

MBA, Business Administration – University of Gloucestershire, UK - 2012

B.Sc. Microbiology – Olabisi Onabanjo University, Nigeria - 2006
